Last September, the island of Ustica hosted the final **Grand Event** of Art4sea, an EU-funded project promoting ocean literacy through art.

DAN Europe is proud to be a project partner, supporting this unique initiative where science, safety, and creativity come together to inspire change.

From underwater exploration to artistic expression, the event celebrated the deep connection between humans and the sea — a mission we fully share.

💙 Dive into the story and discover how art can raise awareness for our blue planet!
