ART4SEA: Call for Artists in Residence (Italy / Greece / Malta)

Inspiring change
for a healthy ocean

In 2024, three small islands in the Mediterranean Sea, Ustica in Italy, Alonissos in Greece and Gozo in Malta, will host a 7-day residency programme where artists will be inspired by the beautiful natural environments, the ancient maritime traditions, and the direct relationships with local communities to create their born-digital and physical artworks. Artists will be encouraged to design artworks to be integrated into the marine, natural and architectural landscapes of the islands, thus creating an open-air and underwater museum making the three Islands a guiding light for Ocean Conservation.

The residency programme will foster a cooperation process between artists and communities to raise ocean literacy and inspire a more environmentally friendly behaviour, with co-creation and cross fertilisation activities on-site and online. Artworks (both digital and physical ones) will become the tangible results of the two-year residency programme that includes for each island:

4 Digital artists.

3 Street/Urban/Guerrilla/Ecological/Graffiti/Land artists.

1 Artist producing underwater artworks/sculptures.

Overall, the programme will involve 8 Artists for each island and 24 artists in total willing to:

Be engaged in co-creating projects to spread people's awareness of marine preservation.

Improve their skills using digital technologies and digital media in the creative process.

Be trained on innovative and sustainable methods applied to creative processes.

The project covers round trips from European cities, boards and lodging costs for the in-person activities. It also provides some support for production costs, and stipends varying from 2000 – 3500 EUR.

Applicants must be based in a European country.

Deadline: 10 November 2023
